

Welcome to Markdown to PDF! 📖

This is a sample document to demonstrate the **amazing** features of our converter! 🎉

Why Use This Tool? 🤔

Converting Markdown to PDF has never been easier! Here's what makes this tool special:

- **✅ Full emoji support** - Express yourself! 😊🚀💡
- **✅ Beautiful formatting** - Professional-looking documents
- **✅ Code highlighting** - Perfect for technical docs
- **✅ Tables and more** - Everything you need

Code Examples 💻

Here's some Python code:

```
def greet(name):  
    """Greet someone warmly!"""  
    return f>Hello, {name}! 🙌"  
  
# Test it out  
print(greet("World"))
```

And some JavaScript:

```
const calculateSum = (a, b) => {  
    return a + b;  
};  
  
console.log(calculateSum(5, 3)); // Output: 8
```

Tables Work Great! 📊

Feature	Status	Notes
Emojis	✅ Working	Full Unicode support

Feature	Status	Notes
Tables	✅ Working	Clean and professional
Code	✅ Working	Syntax highlighting included
Images	✅ Working	Embedded images supported

Lists and More

Unordered Lists

- First item 🥇
- Second item 🥈
- Third item 🥉
- Nested item
- Another nested item

Ordered Lists

1. Install dependencies
2. Run the converter
3. Enjoy your PDF! 🎉

Blockquotes

"The best way to predict the future is to create it." - Peter Drucker

This tool helps you create beautiful PDFs from your Markdown documents! 📄

Links and Emphasis

Visit [GitHub](#) for more awesome projects!

You can use *italic text*, **bold text**, or even ***both combined!***

Horizontal Rule

Conclusion 🎯

This converter supports all standard Markdown features and renders them beautifully in PDF format. Try it out with your own documents! 🚀

Happy converting! 😊 ✨
